Leafy greens such as spinach, kale, and chard--along with lettuces, cabbages, broccoli, and root vegetables like carrots, beets and turnips--are cool-season veggies. Plant them in the desert as soon as the last frost date in the spring and again about eight weeks before the first frost date in the fall.

Many desert-adapted plants such as cactus, succulents, and plants with waxy leaves are adapted to less humidity. However, most vegetables and garden plants need more moisture in the air to grow well in the low desert of Arizona. Native clay soil is great for desert-adapted plants and contains many minerals. However, it is alkaline and is low in organic matter.
