A molecule is an electrically neutral group of two or more atoms held together by chemical bonds. Molecules are distinguished from ions by their lack of electrical charge.. In quantum physics, organic chemistry, and biochemistry, the distinction from ions is dropped and molecule is often used when referring to polyatomic ions.. In the kinetic theory of gases, the term molecule is often used ...

Molecule - Wikipedia

A coordination complex consists of a central atom or ion, which is usually metallic and is called the coordination centre, and a surrounding array of bound molecules or ions, that are in turn known as ligands or complexing agents. Many metal-containing compounds, especially those of transition metals, are coordination complexes. A coordination complex whose centre is a metal atom is called a ...

Coordination complex - Wikipedia

Usage Note: The words chord and cord are often confused—and with good reason, for they are really three words, not two. There are two words spelled chord (listed as separate entries with homograph numbers in this dictionary). The first comes from the word accord and refers to a harmonious combination of three or more musical notes. The second is an alteration of cord, taking its spelling ...

Chord - definition of chord by The Free Dictionary

Source code for online examination system software in vb only, 2007 math 5-7 sats paper answers calculator, Algebra Poems, Boolean Algebra+pdf. Algebrator trial, mcdougal littell algebra 2 +work +book answer key, Softmath, 4th grade sol math worksheet.
